F12.net™

Empower Your IT Team with F12: A Comparative Checklist

Building Trust, Enhancing Security, and Fostering Resilience in Canada's Essential Services and Businesses

At F12.net, we aim to enhance your current IT capabilities, not replace them. Here's a comparative checklist that highlights how partnering with F12 can empower your existing IT team and elevate your IT infrastructure.

IT Requirements	Current Internal IT Team	F12.net Managed IT Services
Support Availability	Monday–Friday, 9-5 best effort support. Reactive support solutions.	24/7 user and network support. Proactive monitoring of managed devices.
Reporting & Documentation	Limited visibility into IT environment. Ad-hoc documentation.	Comprehensive performance and device reporting. Best practice frameworks and SOPs.
Security Solutions	Reliance on off-the-shelf security software. Regular review of tools not a top priority.	Robust, multi-layered security strategy. Security solutions crafted and regularly reviewed by experts.
Governance Framework	Lack of ITIL familiarity and experience. Little or no defined protocols. Difficulties maintaining certifications.	Adopts ITIL best practices. Knowledge & change management protocols. Ongoing certifications and compliance.
Strategic IT Guidance (vCIO)	Ad-hoc, reactive project scheduling. Limited exposure across various IT areas.	Tailored IT roadmap with timelines and budgets. Comprehensive experience driving technological impact.
Professional Services	Projects often delayed due to balancing multiple duties. First-time project completions.	Dedicated professional services team. Extensive experience completing diverse projects on time.
Focused Support	IT team members with multiple duties, being pulled in different directions.	Specialised team members with dedicated focus areas.
Client Service Improvement	No defined mechanisms for consistent feedback.	Regular surveys to continuously improve service delivery.

Why Partner with F12.net?
